

## HAND PUNCH® BIOMETRIC DATA COLLECTION TERMINALS

### Put your hands on the accurate, affordable solution.

TimeTrak now brings the accuracy and convenience of biometric technology easily within reach of any type of business. The HandPunch provides proof-positive employee verification combined with the sophisticated operating features one expects in a modern Time and Attendance Terminal. Because of this unique combination of capabilities, the HandPunch eliminates buddy punching amongst your staff and helps streamline your entire timekeeping process.

In operations that range from coal mines to college campuses to office environments, the HandPunch terminal has proven itself both practical and precise. Easy to implement and even easier to use, the HandPunch fits in anywhere timekeeping accuracy and attendance accountability is desired.
